PROFESSIONAL OBJECTIVE

Versatile Computer Science student and Full-Stack Developer with a strong interest in open-source development and modern software architecture. Proficient in crafting end-to-end applications with Flutter and Next.js, with a focus on writing clean, maintainable code. Seeking to apply a community-driven mindset and technical expertise to develop innovative software solutions within a collaborative professional environment.

EDUCATION

K.R. Mangalam University

B.Tech in Computer Science

Aug 2023 – Jul 2027

- CGPA: 8.33

TECHNICAL SKILLS

Languages: C, Java, Python, Dart, SQL, Kotlin, JavaScript

Frameworks: Flutter, Flask, Jetpack Compose, Node.js, React.js, Express.js, Next.js, Tailwind CSS

Developer Tools: FileZilla, Android Studio, Git, Firebase, Figma, MongoDB, Docker

EXPERIENCE

SDE Intern

Jun – Aug 2025

Department of Design, IIT

Delhi

- Developed Toddle, a game based application to enhance language learning for children with Intellectual Disability.
- Tools used: Flutter, Firebase Auth, Firestore Database, Provider, Go Router, ImageKit, Android Studio

Intern

Jun – Jul 2024

CraftTatva

- Analyze competing platforms' tech stack and UI/UX, and recommend improvements.

PROJECTS

BLF Inventory Management App | *Next.js, React, PostgreSQL, FastAPI, Railway* Jan – Apr 2026

- Developed an Inventory Management System using Next.js, PostgreSQL, and FastAPI for society data.
- Implemented RBAC, custom forms, and a clean API architecture; deployed the full stack on Railway.

cutr | *Next.js, React, MongoDB, Tailwind CSS, Vercel* Jan 2026

- Built a URL shortener using Next.js with MongoDB storage, supporting custom short URLs and fast redirects.
- Implemented collision handling and a pixelated Tailwind CSS UI; deployed the application on Vercel.

Clann | *Flutter, Supabase* Aug – Sept 2025

- Developed an Android class management application using Flutter with modern UI patterns and clean architecture.
- Integrated Supabase for DB and Authentication for secure user login.

Recipefy | *Kotlin, Jetpack Compose, Dagger Hilt, Firebase, Spoonacular API* Apr – May 2025

- Developed an Android recipe application using Jetpack Compose with modern UI patterns and clean architecture.
- Integrated Spoonacular API for recipe search and Firebase Authentication for secure user login.

Spendly | *Flutter, Dart, Firebase, SyncFusion, Kotlin* Jan – Mar 2025

- Built an automated SMS-based UPI expense tracking application with spending analytics and data visualization.
- Recognized with 1st place at Geekathon 2024 and 3rd place at Ideathon 2025.

Blackout | *CSS, Spicetify* Dec 2023 – Present

- Created a true black OLED theme for Spotify to reduce power consumption on OLED displays.
- Merged into the official Spicetify theme repository and published on the marketplace.
