EDUCATION

K.R. Mangalam University

B.Tech. in Computer Science

Aug 2023 – Jul 2027

- CGPA: 8.33/10

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Backend: FastAPI, Flask, Node.js, Express.js, Next.js

Databases: PostgreSQL, MongoDB, Firestore

AI/LLM: Google Gemini, LLM-based Data Extraction

Cloud/DevOps: Docker, Railway, Vercel, Firebase

Tools: Git, Android Studio

EXPERIENCE

SDE Intern

Jun – Aug 2026

Artemyst Marketplace Pvt. Ltd.

Delhi

- Developed an artist management platform using Next.js, FastAPI, and PostgreSQL to replace manual Excel-based workflows and streamline artist management operations.
- Developed an LLM-based data extraction pipeline that transformed unstructured artist data into structured records for storefront display, reducing manual data-entry workflows.
- Established team development workflows by configuring Jira for project tracking and Slack for engineering communication.

SDE Intern

Jun – Aug 2025

Department of Design, IIT

Delhi

- Developed Toddle, a game-based language-learning application using Flutter and Firebase for children with Intellectual Disability.

Intern

Jun – Jul 2024

CraftTatva

- Analyzed competing platforms' technology stacks and UI/UX implementations and recommended product improvements.

PROJECTS

Skinthetix | Next.js, FastAPI, Google Gemini, Pillow, Docker

Jul 2026

- Built an AI-powered Minecraft skin generation platform using Next.js, FastAPI, and Google Gemini, supporting text- and image-based generation with interactive 3D previews.
- Developed a Python 2D skin-rendering engine supporting layered 64×64 Minecraft UV maps and JSON drawing commands, with Docker-based deployment.

BLF Inventory Management App | Next.js, React, FastAPI, PostgreSQL, Railway

Jan – Apr 2026

- Developed an inventory management system using Next.js, FastAPI, and PostgreSQL to manage society data.
- Implemented role-based access control (RBAC) and custom forms with a structured API architecture; deployed the application stack on Railway.

cutr | Next.js, React, MongoDB, Tailwind CSS, Vercel

Jan 2026

- Built and deployed a URL-shortening application using Next.js and MongoDB with support for custom short URLs and redirects.
- Implemented collision handling and deployed the application on Vercel.

Spendly | Flutter, Dart, Firebase, Syncfusion, Kotlin

Jan – Mar 2025

- Built an automated SMS-based UPI expense tracking application with spending analytics and data visualization.
- Achieved 1st place at Geekathon 2024 and 3rd place at Ideathon 2025.

Blackout | CSS, Spicetify

Dec 2023 – Present

- Created a true-black OLED theme for Spotify to reduce power consumption on OLED displays.
- Contributed the theme to the official Spicetify repository, where it was merged and published through the marketplace.
